

PSI – ROOFING RIG / 2 PRODUCTS

STANDARD SPECIFICATIONS AND EQUIPMENT – AIR POWERED PTO SYSTEM

PTO powered Vanair 160 CFM, capable of 150 PSI , screw compressor mounted to the frame of the truck.

To spray the foam material , PSI-Pumping Systems will supply:

Graco air powered King proportioning pump, 2000 PSI, with 1:1 stainless steel bottom ends that can deliver up to 5 gallons per minute. 250' 3/8" I.D. hose group, 2250 PSI. Longer hose groups are available, up to 500' @ \$1,300.00 per every 50'.

2-Graco 1040 diaphragm feeder pumps that supply the materials to the King proportioner. These are equipped with check valves on the pipes that go into the drums. Or Graco 2:1 stick pumps may be substituted at an additional cost.

To spray the polyurea top coat, PSI-Pumping Systems will supply:

Graco air powered Bulldog proportioning pump, 3600 PSI, with 1:1 bottom ends that can deliver up to 2 gallons per minute. 250' 3/8" I.D. hose group, 4000 PSI. Longer hose groups are available, up to 500' @ \$1,600.00 per every 50'. 2-Graco 1040 diaphragm feed pumps that supply that material to the Bulldog proportioner these are equipped with check valves on the pipes that go into the drums. Or Graco 2:1 stick pumps may be substituted at an additional cost

All pumps are equipped with pressure regulators, pressure gauges, and shut-off valves.

Ingersoll-Rand DS-10 refrigerated air dryer for guns.

The truck body is heated by a 40,000 BTU heater running off the engine's cooling system.

Thermostatically-controlled 12 volt zone pumps circulate the heating fluid within hose group to keep it at the correct spraying temperature.

2-Graco air-purged fusion guns with check valves to prevent material backup into hoses. Connections to the guns are swiveled to reduce operator fatigue and increase productivity. You can specify the tips of your choice.

Work bench with 4" vise. 2- 4' overhead fluorescent lights.

Extra air connections for air tools and your fresh air breathing system.

With our equipment, both foam and polyurea top coat can be run at the same time.

Warranty: All Graco equipment carries a one year warranty for repair or replacement of non-wear parts. PSI-Pumping Systems warrants the installation of all equipment for 90 days. Vanair warrants the air end of the screw compressor for life IF their maintenance requirements are followed. The rest of their installation is warranted for one year. The PTO is warranted for correct installation. Because the truck is out of our control once it leaves our factory, PSI-Pumping Systems will not be responsible for damage or repairs to the truck's transmission under any circumstances. We strongly urge you to have the lead crew member be among the people who pick up the truck at our factory so that he or she is properly instructed in its use and maintenance.

The above pricing is for our equipment installed into customer's "PTO-READY" truck. Our terms are 50% down and the balance due on day of pickup. Prices effective August, 2008
